Detected Mood

Anxious

Sentiment

Negative

Stress Level

High

Executive Summary

The patient expressed concern about upcoming deadlines and social interactions. They mentioned feeling overwhelmed but are trying to use breathing exercises to cope. Sleep quality was reported as poor last night.

Full Transcript / Content

I woke up feeling really heavy today. I have that big presentation coming up on Thursday and I just can't stop thinking about it. What if I freeze up? I tried to do the breathing exercise you recommended, the 4-7-8 one. It helped a little bit, but my chest still feels tight. I didn't sleep well either, maybe 4 hours. I just want this week to be over.
